Volume 18

THE REDCLIFF REVIEW THURSDAY, FEB. 5th, 1931

Number 24

## Ratepayers Meeting Draws Big Crowd

Everything Went Off Quietly and Boards Thanked.

The ratepayers annual meeting held in Cliff Hall last Friday evening was one of the best attended we have had in town for some years.

Before the meeting commenced the large turn out was the cause of much speculation as to just what it meant. There were those who said there was going to be something a-poppin' and as time went on everyone was waiting for the poppin' to start. But it never started and before the meeting was over it developed into a regular admiration society in which a motion was unanimously carried complimenting both the Councillors and Trustees for the sacrifices they had made in carrying on the business of the town so successfully for the past year.

Mr. P. Lavell was chosen as chairman, and, after outlining the objects of the meeting, reminded the ratepayers that this was their meeting when it was their prerogative to have questions pertaining to the business of the town, thoroughly discussed.

Mayor Worts was the first speaker called upon. He thanked the ratepayers for the splendid spirit of co-operation they had shown the council during the past year, which, he said, had been fairly successful. The several committees, he said, had kept well within their estimates except in the case of the relief and water works departments and there were beyond the control of the committees as would be shown in their reports.

The chairman of the several committees were then called upon. As Chairman of the several the Waterworks dept. councillor Dacre stated that he deemed the fact that considerable new pipe had been purchased the expenses of his department was less than last year.

Councillor Campeau as chairman of the Public Works dept. said that his dept. had spent \$90.26 less than their estimates, and still kept the works up.

Councillor Brydie as Chairman of the License and Police dept. said the estimates in this dept. were slightly exceeded but that this was due to extra policing at the time there was so many ruberies in town.

For the Fire and Light dept. Councillor Champ said his department had not only kept well in the estimates but had made a small saving.

The Sanitary and Relief committee was reported on by councillor Shaw. He said they had exceeded their allotment but this was accounted for by circumstances over which they had no control, viz the increase in their share of the mothers' allowance and funeral expenses of an indigent.

In summing up Mayor Worts said that next year would be an important one for the council, the Gas Franchise would be up for discussion and settlement and he would like to have the most capable men elected to the council.

The question was asked: "Why the increase in assessment

## New Football Team Has Been Organized

Dominion Glass Employees Have Team in Field.

At a largely attended meeting held at the Dominion Glass Plant last Tuesday evening, the employees decided to organize a football club to enter the local league next spring under the name of "The Dominion Glass Club."

Great enthusiasm was shown at the meeting and already the new club has a formidable array of players lined up for the season.

The following officers were elected:

Hon. Presidents—Messrs. E. Waller, J. MacEneaney, E. Baderu. President—R. S. Hodge. Sec.-Treas.—J. Male. Ex. Com.—G. Lowens, R. Schmidt, B. Moore, W. Yates, A. N. Collier, C. Hayes, E. E. Martin. Trainer—Fred Jones. Asst. Trainer—E. Martin.

Entertainment Com.—J. Podesta Chairman, and T. Davies G. Davies, Jim Podesta, S. Turner and W. Lawson.

Blue trunks, white jerseys and black and white socks, was decided upon for the strips, with a "Diamond D" monogram on the sweaters. The monogram is the plants trade mark.

The entertainment committee decided to put on a whist drive and dance in Cliff hall on Friday, February 20th.

The Canadian Milling Journal it is strange that the farmers in Western Canada are urged to abandon their Wheat Pool and go back to the old system while in other countries (notably Argentina) the farmers are denouncing the old system and demanding Pools.

and increased revenue if all departments keeping within estimates." The Mayor & Councillors Campeau and Dacre explained that by the withdrawal of the rolling mill, Ornamental Iron Works the Royal Bank and other buildings from a tax paying basis, additional revenue was necessary.

A. J. Learmonth, chairman of the School Board, was next called on. Mr. Learmonth explained that the work of the board and staff had been most harmonious during the past year and that no serious complaints had been registered by ratepayers. The board had kept well within its estimates and the government grant had been slightly increased, owing to the improvement in the regularity of attendance of the children. He said they had a most efficient teaching staff as was shown by the very satisfactory reports of the inspector.

Trustee Hodge praised the chairman of the Board for his untiring efforts in looking after the details in connection with the School's business.

Trustee Marty said that during the past year everything had gone along very smoothly.

On motion of Messrs. E. L. Stone and H. M. Sangster the meeting tendered a hearty vote of thanks to the Council and the School Board for their work during the past year.

The meeting closed with the singing of the National Anthem.

## Medalta Directors Here Inspecting Bld.

Much Impressed With Old Ornamental For Plant.

Last Tuesday afternoon, Mr. Carlyle and Mr. Arnold, directors of the Medalta Stoneware plant of Medicine Hat, were in town and in company with Mayor Worts and members of the council, inspected the old Ornamental Iron Building as to its suitability as a building for the manufacture of their wares, should they decide to move their plant away from Medicine Hat.

The directors were greatly impressed with the solidity and excellent condition of the building as well as the conveniences surrounding it, and the very reasonable offer which the town made for its purchase.

Nothing definite was decided upon but the directors stated they would give the proposition very serious and favorable consideration when laying their plan for the future.

Arthur Hodge who has been in the Belcher hospital for the past few weeks, was called home owing to the illness of his wife. He expects to return to the hospital this week end.

Mr. and Mrs. Dick Phillips have given up the Elite Cafe which they have conducted for the past year. Mrs. N. Johnson is taking over the Cafe this week and will conduct in future. Mrs. Johnson has had considerable experience in this line and has the enviable reputation of being an excellent Cook.

The Review learns that Larry Cahoon has been awarded the contract for carrying the mail from the station to the post office. This work has been done for a number of years by J. L. Wright who resigned his position at the termination of his contract. Mr. Wright has been a faithful official and will be greatly missed by the public.

Manitoba Liberals have decided not to merge with the former government forces of that province. Evidently the Manitoba Liberals are profiting by the mistake made by McKelvie King when he tried to join forces with the Progressives, Liberal Progressives, Progressive Liberals, Independent Liberals, Liberal Independents, U. P. A. and so on, in order to keep in power.

## Municipal Elections Here Next Monday

In Cliff Hall From 10 A. M. Till 7 P. M.

VOTE FOR A CANDIDATE

Municipal Election for Town Councillors will be held here next Monday. Voting will be held in Cliff Hall from 10 A. M. till 7 P. M. and Mr. Wm. Henderson will be acting officer. As there are several candidates in the ward with four to be elected, every voter "must" vote for one of the candidates or the ballot will not be counted. Voters should keep this in mind when voting. The candidates will be in the ballot paper in the following order:

Dacre  
Gillbanks  
Hargrave  
Lavelle  
Sangster  
Smith

Pick out the four you want elected and put your cross in the blank space opposite their names. Be sure to vote for four and only four or your ballot will be spoiled, and not counted.

Last week Mrs. A. W. Woodcock of this town received a letter notifying her that she had been elected a life member of the Auxiliaries to the Post of Princeton, Minnesota. The Post corresponds with what is known here as the Canadian Legion. The Princeton Post is called the "Freemont Woodcock Post" after "Monty" Woodcock, son of Mr. and Mrs. Woodcock of this town. This name was selected because "Monty" was the first Princeton boy to make the supreme sacrifice in the Great War, although he enlisted with the Canadian forces, while residing in Redcliff and lost his life in the Canadian army.

## HARVEST VALE U. F. A. HELD ANNUAL MEETING

The Annual Meeting of the Harvest Vale U. F. A. was held last Saturday evening. The officers elected for the coming year were:

Pres.—Robt. Marty  
Vice Pres.—W. H. Dacre  
Sec.—Treas.—R. S. Further  
The financial statement showed the local was in good condition and many important matters were taken up during the past year.

## Carl Axelsson Gets Very Rough Treatment

Was Chased Out of Northern Town By an Angry Mob.

Refusing to sing "God Save the King," delegates to the recently organized Farmers' Unity League and Communist organizations were rotten-egged at Willingdon, Alberta Thursday evening and two rallies started in the Ukrainian temple broke up in disorder.

Carl Axelsson, of Bingleville president of the Farmers Unity League and "Red" leaders from Mundare, known as Karpuk & Novakowsky, received rough treatment at the hands of a hostile crowd estimated at about 300 strong.

Delegate Karpuk was attacked at the railway station by infuriated anti-communist farmers and severely beaten about the head and face.

Later on Mr. Axelsson had to rave police protection to get out of the town.

## YOUNG CATTLE ARE DYING ON PRAIRIE

Stock Inspector Advises Prevention as Preventative.

The Review has been informed that during the past few weeks a number of young calves and yearlings have been dying on the prairie.

R. S. Further drew the matter to the attention of the Dr. Hargrave, the local stock inspector, who is of the opinion that the ailment is caused by a gas poisoning brought on by the young stock getting too much soil while pasturing on the prairie, and not enough water. He advises as a preventative that young stock be given some extra feed, and, despite the mild weather, given a little more of the ordinary winter care.

## ANNUAL MEETING OF HARVEST VALE S. B.

The Annual Meeting of the Harvest Vale School district was held last Saturday afternoon in the School room. The financial report was most favorable and the report of the chairman Geo. Dickson, should that the education of the children of the district was being well cared for.

Mr. Dickson was re-elected chairman of the trustees Board and R. J. McKnight re-elected to the Board. R. S. Further was also re-elected as Secretary-Treasurer.

## Six Men in Field For Town Council

Mrs. Kitchen First Women Elected To Office.

More interest than usual was taken in the Nominations for Councillors and Trustees at the Town Hall last Monday.

There was a goodly number of ratepayers present and more than the required number of councillors were nominated to fill four vacancies. This will mean an election which will be held next Monday.

In the School Board there were two vacancies and as only two candidates were nominated they were declared elected by acclamation. These were Mrs. J. Kitchen and H. G. Sheasby. Mrs. Kitchen has the honor of being the first woman in town to be elected to municipal office.

The following were the six candidates nominated for the council:

W. Harry Dacre, nominated by A. E. Shaw and H. Champ.  
Myles K. Gillbanks nominated by H. Dacre and W. Phillips.  
R. C. Hargrave, nominated by H. Dacre and H. Champ.  
P. Lavelle nominated by G. H. Worts and H. Champ.  
H. M. Sangster, nominated by H. Champ and H. Dacre.  
A. E. Smith, nominated by A. Brydie and A. E. Shaw.

There are. Of these four to be elected. The three receiving the highest vote will be elected for a two year term and the next highest for the one year unexpired term of Mr. Brydie.

Last Monday was Candlemas day and if the groundhog came out he might easily have seen his shadow. According to an old belief this means six more weeks of winter. If it is to be the same kind of winter as we have been having no one will have any kick.

## Churches

GORDON MEMORIAL UNITED CHURCH

Pastor—Rev. R. Ervine Pows  
Sunday, February 8th, 1931  
10:00 A. M. Sunday School  
11:15 Morning worship.  
Subj.: "God our Shepherd."  
7:30 P. M. Evening Worship.  
Subj.: "What We Believe."  
"Ye must be born again."

Rev. Canon W. C. Western

CHURCH OF BRETHREN  
Rev. Ira M. Zeigler, Pastor  
Services every Sunday.  
Sunday School 10:30 a. m.  
Morning service 11:30  
Evening Services at 8:00.  
Choir practice every Thursday evening at 7:30.

Everybody welcome. A special invitation is extended to those who have no church home or do not attend any church School.

ST. MARY'S CHURCH  
Celebration of Mass every Sunday of each month except the First Sunday, at 8:30 A. M.

## Noted Economist Passenger on "Duchess of Bedford"

Among the distinguished passengers on the "Duchess of Bedford" for her last run from England prior to undertaking the two topographical water cruises organized by Canadian Pacific Steamships, was W. W. Swanson, M.A., Ph.D., Professor of Economics at the University of Saskatchewan. The Doctor, who is one of the best known figures in the public life of Western Canada, is regarded as an authority on its economic and sociological problems and has made several visits to British, Russian and other European countries to study the conditions of the production of wheat and is a well-known writer and lecturer on this and kindred subjects. A native of Ohio, Canada, he graduated at Queen's and later at the University of Chicago, and served as the director of Canada from 1909 till 1915, was a prominent provincial politician. He has served as director on the Board of Management organized by the Province of Saskatchewan, was an executive member of the other which represented the province of Saskatchewan and land settlement. He is also known as the founder of the Canadian Farming Industry in British Columbia.

Prof. W. W. SWANSON, M.A., PH.D.

## A Happy Christmas

The Christmas season of good cheer and good will has come again. The centuries-old song of the "Pence on earth, good will toward men" is still being sung in the hearts of mankind. There is present peace between the nations in the sense that they are not engaged in physical warfare, and the League of Nations is striving mightily to maintain that condition. But in the sphere of trade a bitter war is in progress; one of the most intense waged in the history of the world. While the nations are co-operating to prevent physical warfare, they are opposing each other in a great trade battle.

In this great world struggle no two nations appear to be allied together. It is not a contest between two groups of nations, but the game is in the Great War, but a world-encompassing battle in which each nation is fighting against all other nations. Selfish national interests overshadow everything else, and in the resultant struggle all are sustaining loss, while the general public weal of the world is completely lost to sight.

And as the nations lose, the individual citizens in all countries suffer. What the ultimate outcome will be no man can foretell. But what everyone does know is that there is world-wide business depression, widespread unemployment, a world glutted with food products which cannot be sold at a profit to the producer, while at the same time thousands of people are in want for the bare necessities of life.

Under the circumstances it would be rank mockery to extend the time honored wish, "A Merry Christmas." This is no time for merriment, but, if we will, it can be a time of much real happiness.

In countless homes where because of existing conditions, it is not possible to provide the usual seasonal gifts which bring joy to both giver and receiver, dancing lights into the eyes of children and joyful exclamations to their lips, Christmas can be made a very, very happy day in the home. Father and mother can develop a new gentleness, a greater thoughtfulness, a finer tenderness toward each other and their children than may have been theirs. True love will pass through the heart throughout the home, and the absence of the more tangible tokens of affection may be more than compensated for by a finer atmosphere in the home, a spirit of love and tenderness which will draw all members closer together. True happiness may thus be found, and worldly adversity may result in great gain.

And in those homes where the necessity for abandonment of time-honored customs does not intrude, Christmas of 1930 can, by the cultivation of the attitude referred to, be made the happiest Christmas ever known.

Times are hard and suffering prevails. It would be folly to shut our eyes to the facts and seek to deny them. But they will pass on, and later. The index of our individual strength or weakness of character, the measure of our own vigour or listlessness, is not established in times of prosperity, but in times of adversity. It is easy to float with the stream; it is the struggle against the current that makes a man or a woman. The weak can float down stream; it is the strong who struggle upstream to grasp the better things of life.

When we come to the end—and all must pass through them—it is the weak who founder, grasp at unsubstantial straws, abandon principles and ideals, and finally sink in the strong surge themselves for the struggle, sets upon a road that leads to ruin. It is the strong who stand firm, and who, by the cultivation of the attitude referred to, can make the most of the situation.

This is a time of testing. It may well prove to be the most momentous period in many a life. If we weakly give in, cry out against fate, cease to struggle and allow ourselves to drift about forlorn the charts that guided us in the past, we are lost. If we hold fast to our principles, stand our ground, and make ourselves and all about us more discontented and unhappy, we continue to look onward and upward, strive to make the best of things and hold fast to our principles, we cannot fail to become bigger, better, finer, and in so developing ourselves we will also help others and hasten the day of brighter, happier, yes, merry times.

In the hope that this year will mark the end of our Canadian homes at this time, we wish one and all "A Happy Christmas."

## Broadcasting Propaganda

Russia Is Not Bound By International Regulations

Russia, not having been a member of the Washington International Radio Conference held a few years ago, is not bound to observe any international regulations governing radio lengths, H. B. Lees-Smith, British postmaster-general, stated in the House of Commons in reply to a questioner who asked if broadcasts from Moscow could not be controlled. The question was a sequel to the statement of H. H. Gordon, ambassador, foreign secretary, of a few days ago, that he would bring to the attention of the House of Commons broadcasts conducted from Moscow in English and inciting the English workers to join the Soviet Government. The foreign secretary regarded the broadcasts as a violation of the Soviet promise to abstain from propaganda.

## Named After Aviator

Station On Hudson Bay Railway To Be Called "Boyd"

A station on the Hudson Bay Railway will be named "Boyd," after Capt. J. Errol Boyd, of Toronto, the first Canadian to fly across the Atlantic. It is at Milage 250.1 and was originally named "Lindsay" as there is already a station and post office in Saskatchewan called "Link." The post office at Boyd is named after the one on the Hudson Bay Railway will be changed from H. J. Manion. Minister of Railways, took this opportunity to honor the Canadian aviator.

## Source Of Canada's Gold

The chief source of the gold produced in Canada is the gold-bearing quartz deposits of the Porcupine and Kirkland Lake districts in Ontario, which are responsible for more than 85 per cent. of the output.

Bones are composed of two main types of substances—proteins and minerals.

## Wins Grand Prize

Exhibit Of C.N.E. At Antwerp Attracted Much Attention

Depicting the salient features of Canada, the Royal Mounted, the order of the western plains and the mighty waterways of the east by means of a model, panorama, 200 feet long and 15 feet in height, the exhibit of the Canadian National Railways was awarded the Grand Prix at the Antwerp Exhibition. It was announced at Winnipeg. The exhibit included a set of illustrations of Canada, showing scenes in all parts of the Dominion and dealing with many phases of the Canadian life and development, most interesting of which were pictures of the various stages in the production of our wheat. A working model of the Canadian locomotive 6100 was also shown. The exhibit attracted the attention of many thousands who visited the show.

## Will Maintain Traditions

Don Deed Of Winchester Is Distinguished Classical Scholar

The traditions of high scholarship long associated with the deanery of Winchester, England, will undoubtedly be maintained in the appointment of Rev. Edward Gordon Selwyn to the post of Dean of Winchester.

Rev. Dr. Selwyn has been rector of St. John's, in Hampshire, England, for the past 11 years. He served as chaplain to the forces in 1918 and was mentioned in despatches. He is 45 years of age.

The new dean of Winchester is a distinguished classical scholar and editor of the most important religious journals. "Theology." He has been elected preacher at Cambridge and at Oxford in different years.

Bayler's Herb and Ringworms are the most effective remedies for skin diseases. Relieves the most obstinate cases.

## Value Of College Course

To the student working his way through college—and even to those who have their way paid—\$100 a day would seem pretty good wages. And yet, according to figures compiled by the United States Bureau of Education, college graduates earn from \$24,000 to \$112,000 more by the time they are sixty than do those who go to work immediately after leaving high school. A four year college course, therefore, has a value of from \$77 to \$115 a day.

## To Assist Radio Broadcasts

Will Photograph Northern Lights In An Effort To Learn Causes Of State

Extensive experiments, directed by Professor J. C. McLennan, of the University of Toronto, and aimed at the discovery of an entirely new medium of transmission, have been going on for some time now at Blacksmith Rapids, in Northern Ontario and will, with the co-operation of the Department of the Ontario Government, be pushed further, it is understood.

Assistants to Dr. McLennan are engaged at the present time, it is reported, in photographing the Northern Lights in an effort to learn if they cause static—the plague of radio reception.

Blacksmith Rapids has been selected as a base for experimental operations because, it is said, of the particularly clear atmosphere there. It was found there. Establishment of the new medium sought by the investigators will, it is understood, mean the removal of static or, at least, its reduction to almost negligible proportions in radio broadcasts.

## Australian Butler

Federal Government Has Import Duties Under Advise

A cabinet council discussed a report from Vancouver that Canada would be flooded with Australian butter. The cabinet was advised that members the cabinet gave consideration to the whole matter; and while Canada is a free trade country, at the conclusion of the sitting the feeling in political circles is that such a condition will not be permitted to exist.

Previous to the meeting, L. R. McCreger, trade commissioner for Australia, had in a statement issued said there was "absolutely no danger" of the Canadian market being flooded with Australian butter.

## Monthly Bulletin

Publication Will Deal With Important Happenings In The Wheat Situation

A special bulletin dealing with the important happenings in the wheat situation throughout the world has just been instituted in the Dominion Bureau of Statistics, agricultural branch, by Hon. H. H. Stevens, Minister of Trade and Commerce. It will be a monthly bulletin, and will keep the Canadian public in close touch with the wheat situation in Canada and all important countries of production and consumption. Arrangements have also been made for the publication of a series of reports, in co-operation of the Canadian trade commissioners abroad.

## May Hold Investigation

To Enquire Whether Imported Films Contain Propaganda

Minister of Trade and Commerce, Mr. H. H. Stevens, K.C., declared that under the Combines act the question whether imported films contained propaganda affecting the national life of Canada, may be investigated during the course of the inquiry into the affairs of Famous Players-Lasker, Inc., and 22 other distributors and theatre companies.

No evidence or information was received at the opening session of the inquiry held in Toronto, which was ordered by the Minister of Labor, Hon. Gordon Robertson, following a preliminary investigation under the Combines Act.

Millers Worm Powders will clear the stomach and bowels of worms, so that the child will no more be troubled by their ravages. The powders are sweet to the taste and no child is inclined to taking them. They are non-injurious in their composition, and in some cases they are even vomit, that must not be taken on a sign that they are nauseated, but as an indication of their effective work.

## Photographic Marvels

With a new camera, whole pages of newspapers can be accurately copied and reproduced on a piece of photographic paper no larger than a postage stamp. A whole newspaper can be photographed on a roll of film less than three feet long. With a special projector, the copy can be projected on a screen. Dr. Thomas P. Martin, of the Library of Congress, the whole newspaper can be shown in its natural size.

Relieve Your Cold With Minard's Liniment.

## Preparing Seed Exhibit

Over 80 farmers in the North American district have now applied to the British Columbia Department of Agriculture for inspection of their crops with a view to the preparing seed for exhibit at the World's Grain Exhibition and Conference at Regina in 1922.

Glasgow has a lower-hour rent drive.

## Seed End Of Depression

Member Of U.S. Federal Farm Board Says Hard Times Cannot Last

Charles C. Truett, member of the U.S. Federal Farm Board, in an address prepared for delivery before the American Farm Bureau Federation, expressed confidence that the current business depression "cannot last long."

Truett, reviewing events leading to the economic situation, said "confidence has been shaken to such a degree that there has been a general depression far more widespread than the conditions warrant. Our business structure has never been sounder. The great body of our people are working and at good wages. I am therefore confident that this depression cannot last long; already there are signs of better times."

The federal farm board, up to Nov. 1, 1930, had loaned to farm organizations. Truett said, a total of \$300,347,000, of which \$119,900,000 has been repaid, leaving outstanding \$184,447,000.

Commenting on surpluses, he said, "In our major crops, such as wheat, cotton, and corn, there are great surpluses which are being sold at low prices. It is doubtful if there is any cure for depressing surpluses except reduction of production either by voluntary action of producers, or forced by low prices."

## Radio Announcer In Danger

Broadcasting Details Of A Salesman When Steel Belt Closes Through Window

Geoffrey Bartlett, Saskatoon radio announcer, recently was the subject of a description of a stolen automobile. He stood for a second before the microphone. When he had finished his broadcast, he was in the room—a 15-foot steel belt suddenly crashed through the ground floor window, smashed over the microphone and struck the wall.

"His stand is listening, will be pleased to tell the police," Bartlett laughed in the "mike." Stan was a fellow broadcaster and he happened to be listening. Police rushed to the station but Bartlett's assistant had disappeared.

## Need For New Ruling

British-Born Persons Should Be Protected In Canadian Citizenship

"What is needed is a simple amendment that British-born persons whether from Great Britain or the Dominion, who are not Canadian citizens shall be deemed Canadian citizens in every sense of the word and have exactly the same rights as Canadian-born citizens. Until such a law is passed there is not an English, Scottish or Australian citizen in Canada, no matter of how many years standing, who can feel certain that, should he once leave the country, he would be allowed to return to it as a matter of right."

Vancouver Star.

## Attempting Walk Around World

Pair Express Journey Will Take About Four Years

Aspirant to be the first man and woman to walk around the world, Joseph Skulchik, a native of Jugoslavia, and Miss Mary Dudgeon, of Bangor, Maine, arrived in Saint John recently. They will have completed one-eighth of the estimated four-year journey when they reach Halifax. The couple left Washington, D.C., on September 8. They will sail from Halifax for Glasgow, Scotland, and will cover Scotland, Ireland, England, and continental Europe.

## A Good Recommendation

The hard of pure bred Jerseys maintained at the New York state experimental station have been milked by machine for 23 years. This is said to be the longest continuous milking of any cow by machine. At the present time, the average yearly production is 7,300 pounds of milk and 400 pounds of fat, based on the calendar year and including all animals over two years of age.

Persian Balm preserves and enhances women's natural beauty of beauty. Preserves the skin and makes it uninvolved. Tones and rejuvenates the skin, and makes it supple in texture. Delightful to use. Smooths and softens. It imparts a youthful charm to every complexion. It is so pleasant to use, it is impossible to tell its daily virtues. Especially recommended for women of low soft and white. Delicately fragrant. Preserves and enhances the loveliest complexion.

## Makes Job Efficient

Teaching in a rural school is a combined job for Katherine Morgan, at New Albion, Iowa. She has 20 pupils, 18 of which have been in the last name. The whole group is named Hammett except one. All 19 are country.

Minard's Liniment For Frost Bite.

## Bank of Montreal Annual Meeting

The annual general meeting of the Bank of Montreal was marked by a

showing of confidence in the general outlook for Canada. The annual meeting was held at the Bank of Montreal, Montreal, on December 10, 1930.

The annual meeting was presided over by the President, Mr. Charles Gordon, who reported on the business of the bank for the year.

The President, Mr. Charles Gordon, reported on the business of the bank for the year. He said that the bank had a successful year, and that the general outlook for Canada was bright.

The President, Mr. Charles Gordon, reported on the business of the bank for the year. He said that the bank had a successful year, and that the general outlook for Canada was bright.

WORLD HAPPENINGS  
BRIEFLY TOLD

The latest survey shows that only 715 persons in the United States and Canada are both deaf and blind.

The Department of Interior has purchased Flower Port Island in Georgia Bay for national park purposes.

George Eastman, philanthropist, has made a gift of \$100,000 for the establishment of a dental and throat clinic for school children of Paris.

The United States coastguard made an all-time record in life-saving last year, the number of persons rescued being 6,094.

In searching the human heart to find why its failing is the prime cause of death, the United States government will spend \$100,000 next fiscal year.

Jack Miner, well known naturalist, is experimenting at his game sanctuary to see if Canadian muskrats can be used profitably for raising burleros.

It is reported from Hamburg that Thomas A. Edison has accepted the honorary membership offered him by the German "Erfindershaus," an association of inventors.

Official figures of the national census taken last October, give Japan a population of 64,447,000, of which 6,017,000 represent gains during the last five years.

Jesse Byrne, whose home is in Quebec, has been brought out from the shores of James Bay, where he was found in a desolate condition, a victim of the northern winter.

Port Dover, center of fresh-water fishing on Lake Erie, aims to become the hub of the world's first freshwater, genuine sockeye salmon industry. This fish has started to appear in the lake.

"Rocket" planes, 20 years hence, will carry tourists from America to Europe in three hours at less than the present fare for a 30-hour train journey. It was projected by Fritz von Opel, of Germany.

Leaders of the Brazilian Agricultural League have planned for Russia, whereby São Paulo coffee growers would be able to exchange their surplus for Soviet wheat.

## May Reduce Crossing Accidents

Bright Colors Will Distinguish C.N.R. Self-Propelled Cars

With a view to minimizing local crossing accidents, the Canadian National Railway will, during the winter months, paint the front ends of eight self-propelled cars a bright yellow and red as a means of attracting the attention of motorists. A. McCowan, assistant general superintendent of car equipment, has announced. These cars, which replace steam locomotives in some sections of the system, are equipped with bells and whistles but are sometimes mistaken at first glance for an ordinary railway coach.

Cars on western region to make their appearance in this new dress since August 20 last. Quotations on the dollar carried above par last June and it has remained at a premium of a fraction of one per cent. almost constantly since that time.

Bankers attributed the quotation to the seasonal movement of funds across the border requiring large purchases by Canadians of United States funds.

Mexico is considering the reduction of taxes and freight rates.

## Canadian Dollar At Par

Has Been Above Par In New York Money Market Since Last August

The Canadian dollar was quoted at par on the New York money market Dec. 1st, the lowest figure reached since August 20 last. Quotations on the dollar carried above par last June and it has remained at a premium of a fraction of one per cent. almost constantly since that time.

Bankers attributed the quotation to the seasonal movement of funds across the border requiring large purchases by Canadians of United States funds.

Mexico is considering the reduction of taxes and freight rates.

## Russian Lumber For Britain

Shipments Have Been Restricted To Standard Sizes

Shipments of Russian lumber to Great Britain have been restricted to 500,000 Russian standards for the present year and 600,000 standards for 1931, instead of proposed shipments of 750,000 and 850,000 standards respectively, the Department of Trade and Commerce at Ottawa has been advised. Such restrictions have been agreed to following negotiations between Russian sellers and the central soft wood buying corporation, comprising about seventy of the principal lumber importing houses of Great Britain.

## The World's Sheep

There are estimated to be 700 million sheep in the world, equal to about one for every three people. Russia leads with 110 million, with Australia next with 90, and the United States with about 47 million. The world's wool clip is now 3,500 million pounds.

## A Wealth of Knowledge

Cambridge University has now on its twenty miles of shelves a million and a quarter books, nearly 200,000 maps, and over 100,000 manuscripts.

## W. H. N. 1928

## Carbon Monoxide Poisoning

A Timely Warning From the Prevention of Unlucky Deaths

Owing to the comparative frequency, lately, of deaths from carbon monoxide poisoning, Honourable P. D. Munro, M.D., Minister of Public Health, announces that an active campaign is being undertaken by the Saskatchewan Department of Public Health, with the object of effecting a province-wide dissemination of knowledge regarding the perils which are constantly present in connection with this gas. The appeal will be directed particularly to motor car owners, who perhaps are not sufficiently cognizant of the dangers involved. In addition to publicity by means of the press, the campaign will include a wide circulation of pamphlets dealing with the menace. The co-operation of the Department of Highways has been secured, and a warning pamphlet of information will accompany each set of motor license plates issued in 1931. This pamphlet will also be distributed to the public garages of the province.

Carbon monoxide is a colourless, odourless and tasteless gas. It emanates from automobile exhausts, gas stoves, illuminating gas appliances, gas generators and coal-burning furnaces and stoves. It is the result of an incomplete combustion of gasoline, gas or oil. With the approach of winter, and the possibility of less adequate ventilation, the danger of carbon monoxide poisoning from motor cars increases; and the same may be said of furnaces and stoves.

The precaution which should be taken against the insidious action of carbon monoxide gas when a motor is being run in a garage cannot be over-emphasized. Owing to its being colourless and odourless, it takes its victims unawares, and it is of any kind to its victims.

The exhaust gas from internal combustion engines contains carbon monoxide in percentages ranging from a fraction of one per cent. to seven per cent. or even higher, the variation depending upon the proportion of air and gasoline in the mixture burnt. The concentration of carbon monoxide increases with the proportion of gasoline; that is, with a rich mixture, such as might be used in cold weather, the greatest risk would be correspondingly great. A rough estimate of the volume of carbon monoxide which an automobile would produce per twenty horse-power. This would be sufficient to render the atmosphere of a single car garage deadly within five minutes, if the engine were allowed to run with the garage doors closed. In streets where traffic is congested, the content of carbon monoxide rises to about one hundred parts per million of the atmosphere.

When a person is found overcome by carbon monoxide poisoning, a doctor should be summoned at once, as in the meantime the victim should be placed in a warm, well-ventilated room, with arms outstretched. While the doctor's arrival is being awaited, artificial respiration should be employed.

The fundamental essentials of safety lie in foresight and caution; these are the most effective weapons in dealing with what has been termed, the invisible peril of the motorist.

## Believes Glass House Healthy

Woman Has No Faith In Ordinary Type

Miss Geraldine Fitzgerald, of St. James Square, Bournemouth, England, believes, at the age of 84, that a glass house is the healthiest place to live in.

Four years ago she lost faith in houses of brick and had a glass house built in the garden. She has lived in it ever since and declares she is better in health and happier in disposition.

Recently a reporter talked with her in her greenhouse home while the sunbeams dotted the little place with light and warmth.

Miss Fitzgerald told him she had always been delicate and had suffered from typhoid, diphtheria, sore throats and tonsillitis.

"Now instead of always moaning and grumbling and feeling ill, I am better in health than ever I was. I can walk seven miles a day without feeling tired, and I am now 81 at 84."

"This is the secret of being able to do without doctors, and I am sure people would only live in glass houses there would be none of the dreadful complaints we hear of nowadays."

Cooking is done on an oilstove and candles are used for lighting.

Partridge Gled Eastward

Hundreds of flocks of Hungarian partridge have been seen in western Manitoba this year, convincing evidence that these birds are moving eastward out of Saskatchewan and Alberta. Reports as to the observations on the movements of the birds have been kept here by B. J. Hale, principal of the Normal School, and an authority on bird life.

Railway Mileage In Canada

The mileage of steam railways operated in Canada is 42,820 miles. In 1929 there was a net increase in the miles of railways operated of 386 and in total track mileage of 411 miles.

## Proved Economic Value

Revenue From Graf Zeppelin's Flights This Year Fald All Expenses

The Graf Zeppelin in 1929 made a total of 150 flights covering a distance of 14,375 miles and carrying 6,878 passengers and 2,200,000 pounds of mail and freight, weighing 15,106 pounds. The ship now will be shored up in her hangar and her gas removed, after which a thorough inspection test of all her parts will be made. On the basis of this study her officers expect it will be possible to estimate the normal length of an airship.

The sale of passenger tickets for long and short flights covered the cost of gas, salaries, insurance and depreciation, thus indicating the economic value of Zeppelins as traffic carriers.

Among the longer flights it is hoped to make in 1931 is a North Pole flight. This, however, depends largely on the economic situation. While the Graf Zeppelin is being overhauled, a new Zeppelin, the LZ-128, will begin to take shape in a new and larger hangar beneath the Graf Zeppelin's shed. The construction of the new Zeppelin has been delayed by a change in the date of its inflation by helium after the R-101 disaster.

## Strange Discovery In Alaska

Giant Liard-Like Creature Preserved

Reports received from Valdez, Alaska, said the carcass of a giant Liard-like creature, with fur in perfect condition, had been found on Glacier Island near Cordova.

The strange creature, reported to be 45 feet long, had a tail measuring 36 feet, was believed to have been preserved since prehistoric times by being encased in ice in the upper reaches of the Columbia glacier. The ice was believed to have worked its way gradually to the sea. The head was reported to be six feet long and the body 20 feet in length.

## British Air Craft Marvel

Rival To The German DO-X Is Now Under Construction

Britain's rival to the German DO-X flying boat, work on which has just been started, is expected to be the most in the world. The wings of the new monoplane will measure 160 feet from tip to tip, and the huge hull will have two decks containing five passenger saloons which will accommodate 50 passengers and have sleeping berths. The craft will weigh 35 tons. It will be able to fly 3,000 miles at more than 120 miles an hour. The furnishings will be luxurious.

## Had To Be Doubled

The haggard-looking man got into conversation with the happy, care-free bachelor on their train journey to the North.

"Yes," said the former. "I'm the father of six daughters."

"Then you and your wife have six mouths to feed," replied the bachelor. Haggard face shook his head.

"No; we have 12," he returned. "They are all married."

## Black Cat For Luck

A black cat recently entered Bond Police Court, London, England, and sat on the knee of a summoned criminal conductor. When his case was called he passed the cat to another conductor. The cases against both were dismissed. Then the cat was taken to sit beside the magistrate, crossing the path of the next defendant, and he also had his case dismissed.

## Says Wheat Crisis Past

United States Authority Thinks Situation In Agricultural Economics Will Soon Be Easier

O. C. Rittine, of the United States Bureau of Agricultural Economics, believes the crisis in the wheat market is past and the world's consumption of that cereal probably would improve soon.

He addressed the National Association of Marketing Officials on the world wheat situation. Rittine said he did not think "the dumping of Russian wheat on the market was done with any intention to purposely hurt the United States market."

Russia had an unusually heavy wheat crop this year, especially down around the Black Sea where it could be readily exported. There were 34 million acres of wheat in Russia this year; which is more than they ever produced before.

"The wheat production in the United States this past season, was the largest we have ever had," he said.

Mr. Rittine continued with a reference to world wheat production, noting that this year it approximated 2,700,000,000 bushels and that in 1928 it was almost four billion bushels.

"Last year the United States produced 275,000,000 bushels more than it consumed and exports. Because the farmers are feeding wheat to their livestock, the amount of surplus to be carried over this year will be less than the amount of surplus in 1928."

Russia was competing with Canada in pressing wheat on foreign markets, the economist said. Russia exported 55 million bushels from the Black Sea ports from July 1 to Nov. 22. Reports would indicate that shipments might be curtailed in the future.

## Languages Decline

One By One Some Of The Languages Are Dying Out

One of the most painfully acquired instruments with which man deals and which differentiates him from other animals, is language. By language he not only has unlimited discourse with his fellows, but he constructs the immortal books which set him laughing or crying, hoping and dreaming.

It would seem that, once a race through the ages has secured and perfected a significant instrument it would hold fast to it, never let it die. Yet it is a fact that one by one some of the languages of the little people are dying out.

Within the last hundred years Cornish as a spoken language died out of Cornwall—Vancouver Sun.

An Epic Of  
The Far North

Gripping Story Recently Released By Department Of The Interior

A great story has recently been released by the Department of the Interior, of that a gripping story, being the day-by-day experiences of W. B. Hoare as he rambled about the 15,000 square miles that make up the Thelon game sanctuary in search of musk-oven. The sanctuary is east of Great Slave Lake along the Thelon and Hudson Rivers.

Canada and Greenland are the only countries in the world where the musk-ovoids in its native state, and as these animals are being exterminated much as the buffalo were some years ago, the Dominion Government set aside this sanctuary. Musk-oven are about the size of the small Wolf and Scotch cattle and look like buffaloes. Mr. Hoare, with an assistant, J. K. Knox, was sent out by the North-West Territories branch of the department to world wheat production, noting that this year it approximated 2,700,000,000 bushels and that in 1928 it was almost four billion bushels.

"Last year the United States produced 275,000,000 bushels more than it consumed and exports. Because the farmers are feeding wheat to their livestock, the amount of surplus to be carried over this year will be less than the amount of surplus in 1928."

Russia was competing with Canada in pressing wheat on foreign markets, the economist said. Russia exported 55 million bushels from the Black Sea ports from July 1 to Nov. 22. Reports would indicate that shipments might be curtailed in the future.

After a description of the Journey to the Thelon sanctuary, he tells of a lizard which bit himself and his companion on May 26, 1928. After it was over they proceeded and discovered a bed of peat between Port Lake and Artillery Lake. The bed was frozen but some of the peat they dug up had melted in the camp stove.

The diary tells of the long tramps the men took, their contact with caribou and their winter sport at Reliance. Early in March they were back in the sanctuary. A cabin had been erected by Mr. Hoare and Mr. Knox, and Mr. Knox remained bringing supplies. Mr. Hoare started out alone on the trail.

## American Pompeii

Ruins Will Be Sought By Expedition In Arizona Next Year

The ruins of an "American Pompeii" will be sought in Arizona next year by an expedition of the University of Pennsylvania Museum.

This was disclosed by Dr. Harold C. Clifton, professor of anthropology at the university, and a member of the expedition the museum has had for several years in the field near Flagstaff, Ariz.

The ruins, Dr. Clifton said, are believed to lie beneath a layer of black basalt and are 10 to 30 feet thick, which in turn is overlaid by centuries of drift sand deposits.

Tests indicate that primitive men have slightly keener eyesight than civilized white men, but in the case of hearing the situation is reversed.

## Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, stands up to all weather changes in temperature, keeps out cold and wet, allows the full sunlight to enter, including the health-giving Ultra-Violet rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Your chickens and turkeys are healthy, free from disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Distributors: JOHN A. CHANTLER & CO., LTD. 51 Wellington St. W. TORONTO, ONT.

"Three pounds of insect powder 'What you take it with you'!"

"Yes, you surely don't expect me to send the flies away with a Lanette Koller Ziegler, Cologne."

W. H. N. 1928

## Claim That Wild Oats May Be Turned To Profitable Account as Basis of Stock Feed and Porridge

There is hope at last that farms in Western Canada which are dirty with wild oats may be turned to good account. But, as in other agricultural lines at the present time, there is not much profit in this new use for wild oats.

This use is none other than being manufactured into porridge, and according to Charles W. King, of the Wheat, Pool, it is very excellent porridge with a flavor distinctly its own but very attractive.

Two wild oat sowing machines have recently been received at the government elevator at Saskatoon, and will be installed shortly. Porridge making can then be undertaken in earnest.

Wheat Pool has been devoting study recently to finding a market for the large amount of wild oats which are sown with the wheat. Last year a demand was made in Cuba for Canadian wild oats, and the grain was sent to mules, and the mules are not kicking. The oats last year fetched 34¢ cents per bushel P.O.D. Port William.

But many of the sown oats went to the U.S. States, were processed there and the bulked feed oats related in Eastern Canada at 14¢ per ton.

Accordingly, hullers were placed at Port William and samples are now available.

The analysis of the product shows 75 per cent. crude protein, eight per cent. fat and only three per cent. fibre, a composition university authorities here believe should provide a valuable feed for poultry, calves and young pigs.

The protein percentage is higher than that of wheat, and is equal to running usually from 14 to 15 per cent. protein.

As soon as the new hulling machines are installed at Saskatoon, tests will be made, but with coarse grain prices at the lowest levels for years, R. Siddons, in charge of the government elevator, is doubtful if the new feed will be of great interest.

It, however, grain gets back to more normal levels the type of feed would be extremely useful to feeders.

**An Advance In Beautification**

Importation of Plants, Trees and Shrubs Show Increase in Past Few Years

An increasing interest in the beautification of parks and gardens in Canada is reflected in the importations of trees, shrubs, rocks, perennials and bulbs in the past 10 years. In 1919 the Plant Inspection Service of the Canadian Government Department of Agriculture examined 900,000 plants, etc., at ports of entry while last year the number examined was over 450,000. Inspection stations are maintained at Halifax, St. John's, Quebec City, Montreal, Ottawa, Toronto, Niagara Falls, Windsor, Winnipeg, Estevan and Vancouver, where imported plants are examined to ensure freedom from insect pests and plant disease.

**Canadian Butte To Hong Kong**

World travellers who have occasion to stay over at Hong Kong may be served better than they have a quality run. A British Columbia crannery has recently been awarded a contract by a Hong Kong firm of provision merchants for the shipment of 40 boxes of butter per month. For the past eight years shipments of British Columbia butter have been made to Japan and it has sold at a premium in the markets of that country.

**Refuses To Talk Depression**

Subscribers to the Commercial Daily newspaper published at Pine Bluff Ark., will have to look to other publications henceforth if they are to read of "financial depression," "business depression," "hard times" and the like. A front page editorial announced recently these terms would be banned by the Commercial hereafter.

## CAIRN IS UNVEILED

Cockburn Island, Ont., off which the "D. B. King" exploded with a loss of 30 lives on June 29. This was the scene of an impressive service on Monday, November 22, when a large cairn was unveiled to the memory of the victims.

## Feeding Dairy Cattle

How To Apportion Grain According To Butterfat Production

Common methods of apportioning grain to lactating dairy cattle are faulty because they tend to overfeed the low producers and underfeed the high producers, according to H. G. Commins, New Jersey extension service associate dairyman, who explains that in most cases cows are receiving liberal amounts of silage and legume hay, are commonly fed one pound of grain for each three pounds of milk testing less than 5 per cent. and one pound of grain for each four pounds of milk testing less than 5 per cent.

This rule has been found unsatisfactory. Jersey breeders who wish to maintain body weight, and studies show that the recommended amounts of grain do not provide the nutrients required for the stated pounds of milk.

Feeding trials conducted by the Department of Agriculture showed that Jerseys and Holsteins, when fed three pounds of silage for each 100 pounds of live weight, and an unlimited amount of alfalfa hay, will maintain a daily milk flow of ten and sixteen pounds respectively without grain.

Jerseys producing milk testing 5 per cent. butterfat require 4.5 pounds of grain for each pound of milk produced over sixteen pounds. Holsteins giving milk testing more than 3.5 per cent. should receive 4.5 pounds of grain for each pound of milk over sixteen pounds. Jerseys giving milk testing more than 5 per cent. should receive 3.5 pounds of grain for each pound of milk over ten pounds. Holsteins giving milk testing more than 5 per cent. should receive 3.5 pounds of grain for each pound of milk over ten pounds.

By this method of apportionment, it is possible to feed cows more in accordance with their individual production. In the long run, this method is more economical, says the specialist.

## First Steamer To Carry Apples

The first steamer to carry apples direct from Annapolis Royal, Nova Scotia, to London, England, was the "Neptune," which sailed on April 2, 1921. The shipment consisted of 6,800 barrels and arrived in London in 14 days. This venture was fairly successful and from that time the business has continued to increase in volume.

There are almost 600 persons in United States whose income reach or surpass the million dollar mark.

## ROLLING STOCK BUILT IN B.C.

Canada has for years taken the lead in aerial photography and surveying, and the program of last season upon which the world's largest aerial photographic fleet was engaged enabled her to maintain that pre-eminence.

## Won Place At Chicago Show

Saskatchewan School Boy Competed With Hundreds Of Experienced Wheat Growers

A fifteen-year-old high school boy of Grand Coulee, Sask., Milton Ganshorn, was a place for his wheat in competition with hundreds of experienced growers of Canada and the United States at the Chicago International Hay and Grain show, the list of winners discloses.

In the contest for the best hard red spring wheat, the big show through which Herman Trolle won the coveted crown of "wheat king," the name of Milton Ganshorn appeared in first place.

Milton is already known to Regina, for he took first place in the Keweenaw boys' wheat growing competition put on this fall by the local club, and received a cash prize of \$50. Shortly after that he added to his laurels by taking second place in the open competition sponsored by the Regina Board of Trade for the best hard red spring wheat of the district, in which there were 137 entries.

He also secured second place in the Sherwood Municipality contest for the best samples of grain grown in the municipality.

Thus by his work with exhibition wheat this year this Saskatchewan farm lad earned about \$75 in prize money.

Growing prize wheat and working on his home farm are only part of Milton's activities, for meanwhile he is pursuing his high school education to it him all the better for future triumphs. He is in grade 11 and drives eight miles to school every day.

## Used Crewless Launch

Merchant Ships At Mercy Of German Craft During War

That the Germans used in the World War an engine of destruction off the Belgian coast about which practically nothing has been revealed, was the assertion of Rear-Admiral G. R. Blyant of the British navy in an address in opening a luncheon to the Sea-Exhibition in Leeds, England, recently.

Blyant, who was an electrically driven crewless launch controlled from the shore, capable of high speed and quick turning and carrying 500 pounds of gun cotton in its bow, it was designed to ram its prey. It took very skilful seamanship to dodge the craft, which could not start, stop or run with its helm amidships and took a lot of shaking off. Warships were able to sink it with gunfire once its nature was recognized, but merchant ships were at its mercy.

## May Do Some Good

Present Economic Depression Seems To Have A Bright Side

When we feel low in our minds about the state of the nation in general and about business conditions in particular it chimes us to remember that—

Never before have leaders of industry, social workers and politicians tackled an economic crisis with so much intelligence and prepared so far in advance for a hard winter.

Never before have people generally done so much intelligent thinking about the causes of an economic depression, and planning toward preventing a recurrence of hard times.

Never before have industrial leaders so generally conceded that fewer hours of labor without a reduction in wages is the most logical remedy for these conditions.

## Enviably Record Is Made By Canadian Air Mail Service East and West During Past Year

### Want Egg Crates Standardized

Express Companies Ask Establishment Of Fifty-Eight Point Weight

Suggestion by the Board of Railway Commissioners that the Canadian Press Association and the Express Traffic Association get together and reach some "gentlemen's agreement" with regard to standardizing the crates in which eggs are packed resulted from a hearing before the board at Ottawa, on the application of the express companies for an upward revision of rates on that produce.

Heretofore the companies have carried eggs at a flat rate based on an estimate of 55 pounds to the 30-dozen crate. They asked the board that an order be issued establishing the weight at 58 pounds to the crate, which would have the effect of increasing the tariff by enabling the companies to charge for three more pounds.

It was explained to the board that in Western Canada crates with specifications of half-inch wood and weighing in the neighborhood of 11 pounds were used for domestic shipment, while those in Eastern Canada were fabricated of wood seven-eighths of an inch thick and weighed about 16.25 pounds. When eggs were shipped as freight by the railways, a special tariff was applied, and the railways charged on a basis of 58 pounds to the crate.

By a regulation of the Department of Trade and Commerce of 1923 the crate of five-eighths of an inch wood was required as the general standard. Notwithstanding this, however, egg importers were obtaining their produce from the United States satisfactorily in the half-inch containers.

It was brought out that a convention of produce men will be held in January at Montreal, and the matter will be discussed there.

### Needs Looking Into

Canadian Egg Threatens To Become More Like An Apple

What has happened to the Canadian egg? Judging by the latest figures, he threatens to become as rare as the Canadian buffalo. It is an extraordinary story, and disturbing.

In 1927 Canada exported \$25,000,000 worth of eggs and egg products. Last year, exports of the same products fell to \$2,853,000. This year they are still falling. They threaten to fall to less than \$5,000,000.

And that isn't all. For, incredible as it may seem, we are importing pork. In 1929 we imported it at the rate of about \$500,000 a year. This year, judging from the figures of the first four months, we will import \$4,000,000 worth. "We are even importing lard."

It is not more land than she knows what to do with. She has feed for pigs galore. Yet here we are importing pork. It is not more land than she knows what to do with. She has feed for pigs galore. Yet here we are importing pork.

People say what is wrong with Canadian agriculture. It's a big question, but a slight upon it, surely, is this question of pork. Ottawa Journal.

### Went The Limit

Young Angus had been out for the evening with his best girl. When he arrived home he found his father still sitting up. The old man looked up and shook his head.

"Has you been out w' your lassie again?" he asked.

"Aye, dad," replied young Angus. "Why do you look so worried?"

"I've got wonderin' how much the ewen's cost."

"No more than half a crown, dad."

"Aye, that was no son lad," said Angus. "It was all she had," said Angus.

### Has Radium Clock

Dr. Frank E. Simpson has in his office at Chicago, what is the closest approach to perpetual motion ever devised. It is a radium experiment clock which has been running for four years without winding. It is operated by an invisible speck of radium which will continue to be the motive power for thousands of years until its energy has died.

### Silver and Blue Boxes

The silver fox is a colour phase of the common red fox, the blue fox a colour phase of the polar fox. They are now established breeds through the extensive carrying out by the pioneer fox farmers of Canada.

Enthusiasm to a man is what steam is to an engine.

In the first nine months of 1930, over 380,000 pounds of mail were carried by air mail services in Canada. One-half of the services operate out of Montreal. Two new services are projected. One will cover the route from Amos to Sisco, newly settled districts in Northern Quebec, and the second from the Peace River to North Vermilion, in the Northwest Territories. The latter calls for 16 return trips during the winter and will be continued for four years. There are 500 aircraft flying in 1931, and the number of pilots is 717, of whom 403 are commercial pilots. Canada now has 72 air harbours.

Detailing the flights of the various air mail services, a recent report states that the Toronto-Buffalo line flew 7,800 miles in the three months, July 1, to September 30, 1930, and carried 14,000 pounds of mail. All scheduled trips were completed. A total of 15,800 pounds were flown by the Montreal-Albany service, and the operating efficiency was rated at 100 per cent. One hundred and thirty-seven passengers were carried in the last quarter.

Planes of the company operating out of Montreal, which has the contract for a number of mail services, flew 176,624 miles, carried 681 passengers and 5,564 mail pieces, and carried 14,000 pounds of mail. All scheduled trips were completed. A total of 15,800 pounds were flown by the Montreal-Albany service, and the operating efficiency was rated at 100 per cent. One hundred and thirty-seven passengers were carried in the last quarter.

Planes of the company operating out of Winnipeg, these flew 412,013 miles, carried 1,011 passengers, 216,588 pounds of baggage and on scheduled trips was rated at 97.4.

There are 23 light airplane clubs in Canada. For the nine months ended September 30th of this year, membership in the organizations had risen to 11,567 hours. The membership for 1928, 2,887. Ontario has the largest number of flying clubs, with nine; Saskatchewan, three; Nova Scotia, Manitoba and Alberta, two each; Quebec, New Brunswick and British Columbia, one each.

### Canadian Wood Stands Test

Railroads Of British Isles Using Douglas Fir Railway Ties

Last summer a trial shipment of Douglas fir railway ties made to the British Isles. These ties, after being put through several exacting tests by the British railways by the Forest Products Laboratories at London, England, have been declared highly satisfactory. One result is that inquiries are now being made through the British Columbia Government representative in London, concerning another shipment of about 500,000 Douglas fir ties.

Large railroads of the British Isles have been using Douglas fir ties as a result of the test of the Canadian ties, and it met on the question of price and quality. It is expected to further large orders and combined requirements of British railroads in ties alone runs into enormous totals annually. British Columbia has immense reserves of Douglas fir trees and could meet orders from the British and other railways for millions of railway ties with despatch.

### Greatly Appreciated

When Bourneburgh, Hants, England, postal officials decided to do something to improve the post-office, a dozen public pens were fitted with non-corrosive and almost unbreakable pens. Public appreciation of this was so great that at the end of the first day only two pens were left.

### No Life Outside Earth

A study of meteor fragments given on the 14th of May, 1929, by the universe outside of earth. Dr. George Frederick Kuiper, of the Astronomical Society of New York, has concluded. He studied 400 meteorites, and presented his findings to the New York Academy of Science.

## Wheat Pool News

The Alberta Wheat Pool will conduct a referendum on the question of an one hundred per cent Pool next summer when the annual election of delegates is being held. A ballot will be sent to each member on which the following question will be asked: "Are you in favor of the One Hundred Per Cent Pool by legislation?"

H. H. Milliken, Saskatchewan Wheat Pool solicitor: "The present Grain Exchange method of selling wheat is primarily based on the theory that in order to function properly there must be a speculating public at all times to buy or sell, shifting in the most delicately attuned manner from one side of the market to the other as conditions may appear to effect the supply or demand for wheat. In actual practice, when conditions are good the speculating public runs amok on the buying side of the market as for example in the fall of 1929 when as a result of speculation our market was run away out of line in Winnipeg, so that export trade was wiped out; again when conditions are bad there is no speculating public and prices fall out of sight, as is the case at the present time."

The Canadian Co-operator: "What do you think of the Wheat Pool now?" is a question often put to the writer. "Just about what I have always thought of it" has been my reply. The Wheat Pool may or may not have made a similar mistakes to the Canadian private grain trade on the questions of market policy, but it is one of the victims and not the cause of the breakdown of the economic structure of the world.

What we, as co-operators, are more concerned about is that if the Wheat Pool has made mistakes it will realize them, and will not make the same mistakes twice. A man who does not make a mistake does not make anything worth while. The early

development of the British Movement was accompanied by many experimental mistakes. With all their accumulated experience, British co-operators still make mistakes, but they have to be very big before they can be felt, owing to the immensity of their success and resources.

## Outstanding Champion

Mr. "Strathmore C. Koba" prize bull was awarded Reserve All American honors by a committee in the American Holstein-Friesian Association. In addition he won first prize at the Show in Toronto. Strathmore Mary Koba was Reserve All American Junior yearling judge 1930. Both animals were bred at the Canadian Pacific Experimental Farm at Strathmore, Alberta. The Strathmore and Tilly farm, owned by the Agricultural Branch of the Canadian Pacific Railway, made a very remarkable showing at the Toronto show last November. Suffolk sheep from the Tilly farm won every first and second prize and all championships including Champion wether. In Hampshire the flock from Tilly farm won four firsts including Grand Champion ewe, Reserve Grand Champion ram and the Champion wether. Hosiens from Strathmore farm won the coveted Haley & Lee trophy for the second time. Altogether the sheep from the Tilly farm and the cattle from Strathmore farm won eighty ribbons at the Royal Winter Show, Toronto, of which fifty were made up of nineteen Firsts, twenty Seconds and eleven Championships and Reserve Championships.

Retirement Closes  
53 Years Service

Just 23 years ago, a 14-year-old boy joined the old Toronto, and Bruce Railway, as an apprentice in the Motive Power

R. Preston

Today, the retirement of Robert Preston, superintendent motive power, Eastern Lines, Canadian Pacific Railway, closes a career which is something of an epic in the history of Canadian railroading and has extended to the other in many important appointments. Starting his actual service with the C.P.R. as soon as the T.G. and B. was taken over by the great Canadian system, then in its infancy, Mr. Preston, from machinist in 1884, served in various parts of the Dominion, successively, as locomotive foreman; master mechanic and

G. Whitley

He is succeeded by George Whitley, who has been his assistant since 1915 and also has a long record in the service of the company, having started as foreman at Fort William, Ont. in 1902. His employment in various parts of the

G. Allen, Pres.

Desired to come to Montreal for his first experience of service in the East. He joined up as a machinist in the Winnipeg Shops in 1900, and his various posts, ultimately, have all been West of Fort William. Six

## HERE and THERE

On January 15, 1931, the city of Lethbridge, Alberta, was made a point of call on the air mail route operating between Winnipeg and Calgary. Lethbridge is a point of considerable potential importance as the probable point from which the air route to the Coast will commence. Official surveys by technical staff of the Canadian Government Civil Aviation Branch have definitely indicated the route from Lethbridge as the most feasible passage of the Rocky Mountains.

Operating on an equal footing with the fastest system in the world, the Canadian Pacific Great Quotation Service installed by the Canadian Pacific Telegraphs was officially opened with the New Year and places Winnipeg second to none among the world's brokerage centres. Practically perfect operation with lightning speed, ticker tape machines, carrying their news with lightning speed, beating all previous records by two-thirds, is announced by W. M. Thompson, manager, western line, Canadian Pacific Telegraphs.

An official report shows that at the end of November last, there were 446,816 licensed ralloes in Canada or about one for every 23 of the population. Ontario leads with 125,489 sets and Quebec next with 81,022. Toronto leads all Canadian cities with 77,142 sets and in western Canada Vancouver tops the list with 17,830 with Winnipeg next with 15,853. It is only ten years since the first programme was broadcast by radio.

Among foodstuffs taken from the sea, the Indians on the coast of British Columbia put seaweed as worth adding to the menu of an epicurean, and in earlier days it was used among them as money also. On the Atlantic Coast of Canada some use has been made of seaweed, in combination with fish oil, in producing fish meal which is a valuable stock food.

What is regarded as one of the principal unorganized industries of Canada is the work in connection with the cultivation, harvesting and sale of blueberries. No modern methods have been yet applied. It takes hundreds of thousands of pounds in volume of production and there are about 600,000 lbs. in cold storage at the present time. Blueberry pie is a dessert that even Eskimos like and they have smacked his lips over.

Fish caught in the fresh water lake in northern Saskatchewan are now shipped by aeroplane to markets in Western Canada and the United States. About 1,000 pounds of whitefish and trout are carried from the northern lakes to Prince Albert in two daily trips. It is planned to increase the service so that 4,000 pounds can be transported daily to the railroad.

## HARRY DACRE

Solicits your vote and influence for Councillor next Monday. I have been on the Council for the past two years and am now familiar with the Town's business.

## Economy and Efficiency

CHAPTER VI.—Continued.

Mary Maxwell's lips lightened as she replied: "So I gathered before I left. You see, Johnny, just as Julie arrived with the tea wagon (she said that, that old rascal of Selma Smith's, my dear, and almost smothered the tea cups, exquisite egg-shaped china, too), Gay came and sat down with the babies. She certainly made a pretty picture, and I caught Mr. Halliday watching them with a different expression in his eyes. He looked quite human, and said: 'Why not ask Mrs. Hastings to join our party, Angela?' but his wife always goes in a way that I should call insulting, and answered: 'With that day's journey at her heels, she has been looked at me and added apologetically: "These children are cherubs, of course, but my child, Angela, is a little tale to us—nearly, don't you think?" And she handed me a glass of cold water, and the most wonderful and extremely rapping I ever saw, and deliberately turned her back upon that group across the hedge."

"What did Halliday do?"

"He excused himself and went into the house. It was evidently what she wanted. She began questioning me then, and in three minutes I understood why she'd decided to be gracious."

"She wanted to find out about Nick Hastings?"

"John Maxwell, here's my verdict: that woman is what Tom, R. would call a vamp!"

"I'm afraid," replied her husband, his eyes twinkling, "that you've been seeing too many movies. What did she ask you about?"

"She began by saying that he was charming, and hinted that she understood his marriage and been to marry so very young, such affairs were apt to end unhappily, but then, in a little town like this, such things were not uncommon, and we should be charitable."

"Good thunder!" said John Maxwell, unable to control his indignation, "was implying—"

"I think she was, though she was extremely subtle. I was a fool that I split 'twain that exquisite napper. I told her I thought she had used the wrong word—that there was no entanglement about it—that the marriage was happy merely because Nick was starting on a long vacation, and at the last minute found that he didn't wish to leave Gay behind. That's all I left as soon as I made a mistake. She was sweet as syrup, and urged me to be neighborly, but I don't believe she'll return my call in a hurry! If she does, I'll have Katy tell her I'm 'reluctant.'"

John Maxwell chuckled.

"I fear, my dear, that you won't relax till you reach the other side of Jordan; but beyond that, your verdict is my own opinion."

"If you had an opinion," responded his wife with spirit, "would on earth that your object in making her sit down on Elm Street in my best clothes, with the thermometer at eighty? Still—to be sure, she had her bobbed hair and black, snail-like, was worth the effort! Now, John Maxwell, it's your turn to explain. I confess I'm curious as to why."

## In Winter

Outdoor work and play often give rise to sprains and frost-bites. Keep a bottle of Minnar's Vaseline on hand for all the affected parts.

**MINNAR'S VASOLINE**  
"KING OF PAIN"  
NINER

W. N. U. 1968

you're interested in the woman unless Nick—"

"As usual, Mary," interrupted her husband, "you've hit the nail on the head. I want you to tell me I'm an old fool. I can't really believe."

"He went on to relate his fears, while Mary listened with no interruptions. She even sat rocking quietly, and then she said:

"Well?" he questioned.

"I was trying to put myself in Nick's place, the anxious elderly."

"You know, John, I'm rather good at that. My first thought when hearing anything surprising, is how I'd react myself, but I try not to speak till I've viewed it from another's standpoint. I learned that trick when the children were growing up. Sometimes they'd want to do things I didn't approve of—things I wouldn't have done in my own girlhood. It would be on the tip of my tongue to forbid it, and then I'd say to myself: 'Mary, these youngsters are of another generation. Their standards are different from yours. Times have changed.'"

"I was in their shoes, and I see how I'd have felt twenty years ago if I'd been forbidden to do things that all my companions were doing. The world was very easy, but it paid in the long run. Our boys and girls never did things on the sly; and I succeeded my way, and I'm sure you make them see it, because they know I wasn't nasty."

"I have an uninvited admiration in the look John Maxwell gave his wife. "But," he hesitated, "there's one thing wrong with your advice with generations, Mary, and that's the fact that Mary must be true to his own woman."

"I know; but do you think for a minute that Nick is untrue to Gay, even in his eyes? No. I don't know the man, but I can't be as horrible as the idea as you or I, John. But for all that, I don't say he's not in danger. He's got to be as honest as the badge! Nick's younger than his years, and for all his charm he's unapproachable. He's got to be a little more so young, Johnny; and for the last few years he's had no little change. That woman would do anything to stir his imagination. We've never had quite her like in Bakersville."

"Then you don't think me an old fool," said John ruefully.

"No. I wish you could send Nick off to sea from Bakersville."

"But I can't just now. Besides, it's Gay who physically needs a change. She's got shadowy under her eyes, and her pocket was mended with a safety pin. She apologized about it."

"M-m," came thoughtfully from Mary Maxwell. She rocked quietly for a while, valuing a slender sign of life, and then she said:

"I was a little more so young, Johnny; and for the last few years he's had no little change. That woman would do anything to stir his imagination. We've never had quite her like in Bakersville."

"Then you don't think me an old fool," said John ruefully.

"But I can't just now. Besides, it's Gay who physically needs a change. She's got shadowy under her eyes, and her pocket was mended with a safety pin. She apologized about it."

"M-m," came thoughtfully from Mary Maxwell. She rocked quietly for a while, valuing a slender sign of life, and then she said:

"I was a little more so young, Johnny; and for the last few years he's had no little change. That woman would do anything to stir his imagination. We've never had quite her like in Bakersville."

"Then you don't think me an old fool," said John ruefully.

"No. I wish you could send Nick off to sea from Bakersville."

"But I can't just now. Besides, it's Gay who physically needs a change. She's got shadowy under her eyes, and her pocket was mended with a safety pin. She apologized about it."

way into the living-room. "I got to see John Maxwell before noon. Thought I'd come round this way and leave my grip—that is, if it's convenient for you to put me up."

"Did you think we'd let you go to the hotel?"

Gay laughed, but the old man noticed that she had quite a different expression in her face. He was very tired, and that her eyes were shadowy. This wasn't the Gay he remembered, and his face clouded.

"Ain't you feelin' real smart, shirky?" he questioned.

She straightened up, and smiled.

"Now don't you begin worrying about me! I'll be all right in no time. I just a lot of sleep while the children were laid up, you know. Nick helped all he could, but there are some things that no one but Mother can see to manage. Besides, the first best days take all my vitality; and I since the world was very easy, but it paid in the long run. Our boys and girls never did things on the sly; and I succeeded my way, and I'm sure you make them see it, because they know I wasn't nasty."

"I have an uninvited admiration in the look John Maxwell gave his wife. "But," he hesitated, "there's one thing wrong with your advice with generations, Mary, and that's the fact that Mary must be true to his own woman."

"I know; but do you think for a minute that Nick is untrue to Gay, even in his eyes? No. I don't know the man, but I can't be as horrible as the idea as you or I, John. But for all that, I don't say he's not in danger. He's got to be as honest as the badge! Nick's younger than his years, and for all his charm he's unapproachable. He's got to be a little more so young, Johnny; and for the last few years he's had no little change. That woman would do anything to stir his imagination. We've never had quite her like in Bakersville."

"Then you don't think me an old fool," said John ruefully.

"No. I wish you could send Nick off to sea from Bakersville."

"But I can't just now. Besides, it's Gay who physically needs a change. She's got shadowy under her eyes, and her pocket was mended with a safety pin. She apologized about it."

## Education On Canadian Matters Is Advisable

Ontario Postmaster Thinks Average U.S. Citizen Has Twenty To Learn

The average United States citizen is so unenlightened on matters affecting Canada, and it is the duty of United States publications to furnish that enlightenment, in the opinion of R. J. Danneberg, postmaster, St. Thomas, who recently wrote to the National Geographic Society as follows:

"The renewal of my fees for the National Geographic Society, I beg to advise you that I have decided to discontinue my membership. I see no consistency in sending me good Canadian material to the United States, when I have had the same good Canadian material scornfully, even insultingly, refused acceptance in Boston, Los Angeles, El Paso, New York and other United States centres; at a time, too, when Canadian money was rated above par."

"I might suggest that the National Geographic Magazine with its wide spread influence, could do a great service to the people of the United States by enlightening their appalling ignorance of Canada. The average United States citizen appears to regard Canada as a land of perpetual snow, where I live and grow as fine a grade of tobacco as is raised in Kentucky; that our farmers are growing, raising, and shipping, and we grow peaches and grapes equal to anything grown in California. The average number of farmers, as indicated by electricity. Incidentally, you might tell them that Canada grows all the fresh water fruit on the globe, and that there is a room in the Province of Ontario (there are nine provinces) to set down four of the United States, namely, New Hampshire, Connecticut, Rhode Island and New Jersey."

Robert Walker, Blue River, B.C., for the rescue of Evelyn Massey from drowning at Elbow Lake, Blue River, B.C., August 28, 1929.

**Trans-Canada Phone Line**

All Canadian Telephone System To Be In Operation By New Year

Work has started on the building of the National Columbia line of the Trans-Canada Telephone Line. A direct system through the Crown's Nest Pass to Alberta will be provided to replace the present system of routing telephone calls between British Columbia and other parts of Canada across the United States.

The proposed system will cost \$1,250,000 and will involve some 650 miles of new line, and a number of which has already been built.

The principal Canadian telephone companies are a provincial system co-operating in the trans-Canada project and it is expected that an entirely all-Canadian telephone system between Halifax and Vancouver will be possible by the end of next year.

**Cheapest Of All Oils.**—Considering the qualities of Dr. Thomas' Electric Oil it is not surprising that the oil is offered to the public. It is the most valuable and extremely moderate in price, no one should be without a bottle of it.

**Shipments Of Wheat.**—From August 1 to October 30, 1929, shipments of wheat from Canada to the United States amounted to 2,375,735 bushels to 63 countries. The British Isles were the largest buyers of wheat and grain, having taken 488,707 bushels and 774,811 bushels respectively. Germany was the second largest customer for flour with 388,215 bushels.

**Saves Flashes From Drowning.**—The polymizer, used to save human beings from suffocation, is now used to save fishes from drowning when they breathed up all the oxygen in transportation tanks of water.

An Eskimo boat, heated by seal-oil, has a temperature of 70 to 80 degrees.

## Palpitation Of The Heart Nerves Were All Gone

Mrs. Rose Griffin, Astoria, Minn. — "About five years ago I was troubled with palpitation of the heart, and my nerves were all gone, and I could not sleep."

"I read about Milburn's Heart and Nerve Pills, and decided to try them. I had taken three boxes I was feeling fine again. I think they are a wonder, and wish all others who suffered as I did to get them."

Sold at all drug and general stores, or direct receipt of the The T. Milburn Co., Ltd., Toronto, Ont.

**Abyssinian Ruler Ambitious**

Wanted Unity Of Empire and Proposed Marriage To Queen Victoria

Rulers of Abyssinia are ambitious, according to Prof. R. A. B. Merer, who lectured recently in Trinity College Library, Toronto.

In the days of Queen Victoria, Professor Mercer told his audience, the Abyssinian Emperor conceived the idea of uniting the two empires. He wrote to Queen Victoria asking her hand in marriage. The British did not reply and for some years thereafter the thwarted emperor satisfied his disappointed affections by maltreating every white man he could lay his hands on.

In more recent years, the speaker recalled, the Emperor and six kings of Abyssinia, had toured Europe. One of the kings was immensely intrigued by a Rolls Royce he saw in London, England. He also saw a French car which appealed to him. He bought both and returned with his two cars and a mechanic. But he overrode the fact that there were no roads in his mountainous kingdom. However, he solved the problem by having a road built around his place on which he still drives his two high-powered cars.

Professor Mercer argued against the popular belief that races do not change in color. The Jews of Abyssinia, for instance, were black but they had never inter-married with the black race. In thousands of years of contact with the white race, they had completely changed in color, though their features were still those of the Semitic race from which they came.

### Interesting Local Items

Don't forget the Skating Ring Dance on Friday, Feb. 13th.

Last week and Miss Ada Zeigler left for Lethbridge by motor. From there she will go to Victoria where she will remain for the summer with her brothers.

About nine car loads of feed have been delivered in this district during the past few weeks under the free freight plan.

Quite a number from town saw "All Quiet on the Western Front" at the Dreamland, Medicine Hat, and think it one of the best. This picture has been so popular that it will be continued the balance of this week. Be sure to see it.

Three social evenings are arranged by local organizations. On Friday, Feb. 13th, the Skating Ring will have one. The Dominion Glass plant football on Feb. 20th, and the Local Legion on Feb. 27th. Each will be a whistle drive and dance and all are worthy of support.

The mild weather of the past few weeks has put the cat in the skating rink. The ice is spoiled for use and prospects are not very promising for the immediate future.

#### LEGION MEETING

The regular monthly meeting of the local Legion will be held in the club rooms on Sunday afternoon next at 3 o'clock. A full attendance is requested as business of importance will be up for discussion.

#### COMMUNICATION

What Has Become of Our Town Band.

To the Editor of Review:

In days gone by, Redcliff had a good town band, and even today we know that we have quite a number of Musicians who would make a good nucleus for a good band and there are quite a few young men who have grown up since the band has disorganized, who would like to take up there spare time in forming a band. The town has several instruments for that purpose and a goodly supply of music and it only requires some one sufficiently interested to take the leadership.

It would not be long before we could have a band going again. It is a clean, wholesome, instructional past time for any boy and is always a credit to a town. Now is the time to get started. We feel we are on the eve of better time coming when our town might feel proud to have such an organization. We know that there is no financial return worth while being a bandsman but the educational value and pleasure you get out of it is worth any boy's time. I have been the sole trustee of the band here for some time and would like to throw out a challenge to the younger men of the town to put what equipment we have into use once more. If you are interested in a band let me know, and we will be glad to turn the equipment over to you, citizens of Redcliff who would be willing to use it.

Signed
